## Invitation +

I am truly grateful to introduce the KGOG 2022 Spring Semi-Annual Meeting at BEXCO, Busan.

KGOG has held small committee-centered academic meetings once or twice a month, examining the clinical trials conducted in South Korea and striving to develop new research protocols. Thanks to our enthusiastic members, clinical outcomes are being accumulated even amidst the poor environment of the COVID-19 era. I take great pride in this both as the president and a member.

For this Semi-Annual Meeting, one of the collective meetings for KGOG members that are hosted four times a year, we have again organized the program with content focused on clinical trials from start to the end under active participation from our members.

For this meeting, we considered how we always ran out of meeting time and thus included a day and a half more in the program.

The event will be conducted in the structure of an Academic Business format that is different from general conferences, and attending members consist of professors in gynecology (majoring in gynecologic oncology), radiology, and medical oncology and CRAs (Clinical Research Associates), as well as members related to clinical trials of multinational pharmaceutical companies.

Currently, South Korea accounts for a significant portion of worldwide clinical-trial competencies. Of course, it is a fact that most are constituted by clinical trials supported by multinational pharmaceutical companies, and our KGOG's product, KGOG-led IIT research, still has parts that need to be cultivated in the quantitative and qualitative aspects.

To achieve meaningful research results, you need ideas, skilled personnel, and adequate research funding. KGOG executives, members, and CRAs are working today to secure research funds and create ideas under the name of KGOG.

Lastly, if motivated researchers approach KGOG at any time, we have low barriers to help you and your leaders conduct clinical trials.

Thank You.

Hello?

We thank and welcome the members who attended this Semi-Annual Meeting of KGOG despite the tough era of COVID19 pandemic.

This SAM was prepared to the extension of the changed format and content at the last SAM. We have prepared a workshop for each committee, focusing on the approved studies in development and the progress of proposed studies. We also have prepared Special Sessions for promising new studies, and Industrial Session. Thank you to committee the chairs, co-chairs, secretaries, and members of each committee for preparing and presenting this workshop held simultaneously in a total of 3 rooms.

Although some committees cannot participate in this SAM, we hope that this SAM will serve as an opportunity for the studies of KGOG to advance one step further.

Thank you.

Kim, Jae-Hoon  
President of KGOG

Choi, Min Chul  
Program Director of KGOG
